An NRSC instructor, who gets prior authorization can do a lunge line lesson in the front or covered area only when there is no interference to any other riders sharing the same arena and circle needs to move often. No horse exercising lunge line work is to be performed in Front or Covered area. Round pens in Covered arena may only be used for beginner/novice lessons when the outside round pens are non-usable due to weather related conditions. Exercise lunging of horses in Covered arena round pens will not be allowed during dry

weather conditions, but will only be allowed with prior notice of authorization when outside pens are non-usable due to weather related conditions, and must be done with a lunge line attached, under control by handler and cannot be performed when others are riding in the round pen or open part of cover arena. Once outside pens are dry and usable again the special authorization period to lunge in the Covered arena round pens will be revoked and return back to No lunging regulations. 26. A horse at liberty that disrupts the safety of riders must be caught immediately and removed from the turnout. Priority of round pen/turn out use: 1) Riding lessons with instructor. 2) Riding as an individual. 3) lunging and turnouts. Turn out and lunging time limit when all round pens/turn outs are in use will be 15 minutes when another is waiting. This is the time that the horse and boarder has originally entered the round pen/ turn out. Do Not leave horse unattended for long periods of time, stay close by to be able to watch horse and/or for others who may come into a waiting line up.
27. When the tractor comes to an arena, round pen or turn-out you must exit that area to allow it to groom the footing. Normal daily grooming of arenas will be planned for early mornings. The schedule from time to time will adjust due to weather conditions, events or other maintenance. Prior to rain events, certain areas will be sealed (prepped for assistance to help it dry quicker after rain) and access will be declined during this practice till after the rain and area has dried efficiently. There will be some pens left open during these weather events, and any boarder who uses them is doing so at their own risk.
